Goals and Plans if elected?

Over the past year serving as President, I have been able to develop a relationship with the Board of Directors which has led to the Board engaging in productive discussions where each member is regularly asked for input so that every voice is heard, and decisions are made as a group. I have found that in my role as President I am able to help guide and organize these diverse ideas into plans that we are currently implementing. In the past year this has included helping to re-engage the districts to return to in-person member engagement events and working to forge a congenial relationship with SC LLR. In the upcoming term my goal is to attempt to identify and implement new ways to serve our members through engaging, cost-effective continuing education opportunities, member engagement on the district level, and creatively harnessing the power of our students and young professionals. In the coming year I am looking to guide the board into creation of a strategic plan that guide the board of directors and is tangible to each member. I would be honored to be able to continue into a second term as President to continue these initiatives.

Why are you qualified for this position?

I am qualified for this position as I am currently serving in the role of President and have now been a part of the Board of Directors for the past 3 years which has helped equip

me with the institutional knowledge and experience to help guide APTA SC over the coming years.

Goals and Plans if elected?

If elected, I can promise that I will work closely with APTA SC leadership and maintain accessibility to you. My goal is to represent South Carolina at the APTA House of Delegates well by prioritizing the needs of our practitioners and the communities we serve. I plan to critically review motions that are presented for consideration by making sure that they are worded to safeguard our profession and position us to address future needs. I also plan to work with our delegate team to craft and present motions that are in the best interest for our state and profession at large. Hearing from you will be crucial to making sure that motions address the needs that you and your communities have. Lastly, I plan to continue to embody my core values of respect, collaboration, diversity, and inclusivity, in this role. You can expect that my actions as a delegate will be in step with these values as a representative for you and our state.

Why are you qualified for this position?

I believe that I am uniquely qualified for this position because of my experience as an active clinician, researcher, and educator. Involvement across these domains have given me important insight into the current challenges our profession faces and some foresight into how the APTA can position us to address future needs with innovation. I have experience working with the APTA SC leadership as a member of the Research and Education Committee and with our current and past delegates as a coordinator for the simulated House of Delegates activity for DPT students at MUSC. Coordinating this activity at MUSC has provided me with a deeper understanding of how the House of Delegates functions, motions are created and debated, and how delegates can work together to best represent the needs of our state along with the needs of our profession

at large. As a delegate, I will be able to bring together all of these experiences to best represent you when APTA policy is established.
